License and Third-Party Notices

Introduction

Last updated: 26.02.2026

We are obliged to tell you about licenses that LumiFind and its libraries use.

Project License

LumiFind is a commercial software product developed by MIDILLI Tech. It is licensed for use only with valid purchase or subscription. Redistribution, sharing, or resale of LumiFind is strictly prohibited except through official MIDILLI Tech channels.

Licenses may be activated on multiple devices owned by the licensee, subject to MIDILLI Tech's activation policy. Resale or transfer of licenses is strictly prohibited.

The software, its source code, components, and design are the exclusive property of MIDILLI Tech and may not be altered, reverse-engineered, or decompiled. Use of LumiFind is permitted only to the license owner. License terms may be updated by MIDILLI Tech; continued use of LumiFind constitutes acceptance of the latest license terms.

Third-Party Dependencies & Licenses

This software incorporates third-party open-source libraries. Each component is used in accordance with its respective license.
The software provider performs due diligence when selecting, integrating and updating these components.
However, all third-party components are provided as is by their original authors, without warranties of any kind.
Users can review the corresponding licenses included with the product.
The software provider ensures that the overall product is maintained, updated and supported within reasonable industry standards.

This project uses the following Python packages. Their licenses are listed below:

```
Package                 | License     |
------------------------|-------------|
langchain               | MIT         |
langchain-community     | MIT         |
langchain_text_splitters| MIT         |
sentence-transformers   | Apache-2.0  |
chromadb                | Apache-2.0  |
pypdf                   | BSD-3-Clause|
python-docx             | MIT         |
python-pptx             | MIT         |
msoffcrypto-tool        | MIT         |
openpyxl                | MIT         |
markdown                | BSD-3-Clause|
unstructured            | Apache-2.0  |
cryptography            | Apache-2.0  |
torchvision             | BSD         |
librosa                 | ISC         |
moviepy                 | MIT         |
hf_xet                  | Apache-2.0  |
ocrmypdf                | MPL-2.0     |
pypika                  | Apache-2.0  |
unstructured_inference  | Apache-2.0  |
unstructured_pytesseract| Apache-2.0  |
pdf2image               | MIT         |
pyperclip               | Apache-2.0  |
sentencepiece           | BSD         |
beautifulsoup4          | MIT         |
watchfiles              | MIT         |
mediapipe               | Apache-2.0  |

Special Notice for MPL-2.0 (ocrmypdf)
If you modify any files from ocrmypdf, you must make those modified files available under the
MPL-2.0 license.
```

For full license texts, see each package's repository or PyPI page.
