Version History

- 1.3.0 (27.08.2026):
  - Added finger joint support with `--finger-joint` and per-side `--no-finger-*` options.
- 1.2.0 (05.11.2025):
  - Now available for Windows, Linux, and macOS as well.
  - `box-height-3d`, `material-thickness` and `outer-sizing` arguments can be also used in JSON (can be overridden via command-line argument)
- 1.1.1 (15.07.2025):
  - Added option to separate any sides from the merged file, if used with `--single-part`.
- 1.1.0 (01.04.2025):
  - Added text engraving option with custom rotation, font size, and engraving depth.
- 1.0.1 (08.02.2025):
  - Replaced `height` with `length` in JSON to avoid confusion.
- 1.0.0 (22.01.2025):
  - Initial version.
