Project Panel (Left Sidebar)

The left panel contains project-wide settings and general actions.

Sections:

- **Project Name:** Name your current project.
- **Dimensions:** Define width, length, and height of the box.
  - Units can be switched between **cm** and **inches**.
- **Material Thickness:** Set your material's thickness (e.g., 3mm plywood or acrylic).
- **Outer Sizing:**
  - ☑ Checked → Dimensions include material thickness.
  - ☐ Unchecked → Dimensions refer to inner cavity size. The overall size is bigger.

> Read more on outer sizing in the respective tool manuals.

- **Enabled Sides:** Choose which sides (Front, Back, Top, Bottom, Left, Right) are visible and editable.
- **Update Sides ⬚:** Regenerates the box with selected sides.

Load / Export:

- ⬚ **Load**: Load an existing `.json` project.
- ⬚ **Export**: Save your design as a `.json` file.
